

d. 7 Grudnia 1885

San Remo  
Villa Vermy.

Kochany panie Władysławie - Naprawdę  
 sam jestem nie podziwiałem, że  
 w polityce - wpycha mnie do tego,  
 żebyś tak byłem i jertem albo zaś  
 niepotem uokazaniem albo nie  
 zdrow i przybył, że mi piła  
 ludno. Zdrowie mi nie doży nie  
 potężyto, więc się cię i nie  
 wiem czy i tu utęż. Tak  
 powiedziałeś sobie poprzetem cały  
 organizm. Wpadłem tu na trzy-  
 czę, chociaż San Remo nie jest  
 przepięknie. Bardzo pięknie, bar-  
 dzo klimatyczne, nawet ciepło, ale  
 wpycha bardzo doży i tę  
 podoba. - Pewnie mi się podoba.  
 Tym razem na rok najtem to  
 miękka, potem - niewiem.  
 Kiedy zabierę się do maja  
 w kierunku rajzic.

Numera Kwojra w ktorym byl mój  
asylant - niemam - ale miatem  
sobie za obowiazek raz cala powadz  
powiedziec, wiedzac ze kraj wy-  
drukuje. Jan! Ty pod illu - kato-  
ry - niechcisz mi narzucic -  
wiew jakie L kuz na mnie  
sprowadzi, ale jeshm jui oshda  
ny: niemam nic do plocenia,  
co beda pilni potem i mowic -  
kuj z uienim.

chuj panie w. dyblonie, przyjdij  
mi jakie kabluzi, jui wyta  
niemam co, a jebal pracowac  
nie moge na swoje - i piczusz  
si po ty wstka magdeburskiej.  
Lipham podurmie dloni wstka -  
puzniczany wib puzn  
i puznicz

J. M. W. W.

The first part of the paper  
 is devoted to a description of  
 the various species of  
 plants which are found  
 in the region of the  
 mountains. The second part  
 is devoted to a description  
 of the various species of  
 animals which are found  
 in the same region. The  
 third part is devoted to a  
 description of the various  
 species of insects which  
 are found in the same  
 region. The fourth part  
 is devoted to a description  
 of the various species of  
 birds which are found in  
 the same region. The fifth  
 part is devoted to a  
 description of the various  
 species of reptiles which  
 are found in the same  
 region. The sixth part  
 is devoted to a description  
 of the various species of  
 amphibians which are  
 found in the same region.  
 The seventh part is  
 devoted to a description  
 of the various species of  
 fish which are found in  
 the same region. The  
 eighth part is devoted to  
 a description of the  
 various species of  
 mollusks which are found  
 in the same region. The  
 ninth part is devoted to  
 a description of the  
 various species of  
 crustaceans which are  
 found in the same region.  
 The tenth part is  
 devoted to a description  
 of the various species of  
 sponges which are found  
 in the same region. The  
 eleventh part is devoted  
 to a description of the  
 various species of  
 corals which are found  
 in the same region. The  
 twelfth part is devoted  
 to a description of the  
 various species of  
 sea anemones which are  
 found in the same region.  
 The thirteenth part is  
 devoted to a description  
 of the various species of  
 jellyfishes which are  
 found in the same region.  
 The fourteenth part is  
 devoted to a description  
 of the various species of  
 comb jellies which are  
 found in the same region.  
 The fifteenth part is  
 devoted to a description  
 of the various species of  
 ctenophores which are  
 found in the same region.  
 The sixteenth part is  
 devoted to a description  
 of the various species of  
 tunicates which are found  
 in the same region. The  
 seventeenth part is  
 devoted to a description  
 of the various species of  
 ascidians which are found  
 in the same region. The  
 eighteenth part is  
 devoted to a description  
 of the various species of  
 thaliaceans which are  
 found in the same region.  
 The nineteenth part is  
 devoted to a description  
 of the various species of  
 euphausiids which are  
 found in the same region.  
 The twentieth part is  
 devoted to a description  
 of the various species of  
 copepods which are found  
 in the same region. The  
 twenty-first part is  
 devoted to a description  
 of the various species of  
 nauplians which are found  
 in the same region. The  
 twenty-second part is  
 devoted to a description  
 of the various species of  
 rotifers which are found  
 in the same region. The  
 twenty-third part is  
 devoted to a description  
 of the various species of  
 nematodes which are found  
 in the same region. The  
 twenty-fourth part is  
 devoted to a description  
 of the various species of  
 annelids which are found  
 in the same region. The  
 twenty-fifth part is  
 devoted to a description  
 of the various species of  
 mollusks which are found  
 in the same region. The  
 twenty-sixth part is  
 devoted to a description  
 of the various species of  
 crustaceans which are  
 found in the same region.  
 The twenty-seventh part  
 is devoted to a description  
 of the various species of  
 sponges which are found  
 in the same region. The  
 twenty-eighth part is  
 devoted to a description  
 of the various species of  
 corals which are found  
 in the same region. The  
 twenty-ninth part is  
 devoted to a description  
 of the various species of  
 sea anemones which are  
 found in the same region.  
 The thirtieth part is  
 devoted to a description  
 of the various species of  
 jellyfishes which are  
 found in the same region.  
 The thirty-first part is  
 devoted to a description  
 of the various species of  
 comb jellies which are  
 found in the same region.  
 The thirty-second part is  
 devoted to a description  
 of the various species of  
 ctenophores which are  
 found in the same region.  
 The thirty-third part is  
 devoted to a description  
 of the various species of  
 tunicates which are found  
 in the same region. The  
 thirty-fourth part is  
 devoted to a description  
 of the various species of  
 ascidians which are found  
 in the same region. The  
 thirty-fifth part is  
 devoted to a description  
 of the various species of  
 thaliaceans which are  
 found in the same region.  
 The thirty-sixth part is  
 devoted to a description  
 of the various species of  
 euphausiids which are  
 found in the same region.  
 The thirty-seventh part  
 is devoted to a description  
 of the various species of  
 copepods which are found  
 in the same region. The  
 thirty-eighth part is  
 devoted to a description  
 of the various species of  
 nauplians which are found  
 in the same region. The  
 thirty-ninth part is  
 devoted to a description  
 of the various species of  
 rotifers which are found  
 in the same region. The  
 fortieth part is devoted  
 to a description of the  
 various species of  
 nematodes which are  
 found in the same region.  
 The forty-first part is  
 devoted to a description  
 of the various species of  
 annelids which are found  
 in the same region. The  
 forty-second part is  
 devoted to a description  
 of the various species of  
 mollusks which are found  
 in the same region. The  
 forty-third part is  
 devoted to a description  
 of the various species of  
 crustaceans which are  
 found in the same region.  
 The forty-fourth part  
 is devoted to a description  
 of the various species of  
 sponges which are found  
 in the same region. The  
 forty-fifth part is  
 devoted to a description  
 of the various species of  
 corals which are found  
 in the same region. The  
 forty-sixth part is  
 devoted to a description  
 of the various species of  
 sea anemones which are  
 found in the same region.  
 The forty-seventh part  
 is devoted to a description  
 of the various species of  
 jellyfishes which are  
 found in the same region.  
 The forty-eighth part is  
 devoted to a description  
 of the various species of  
 comb jellies which are  
 found in the same region.  
 The forty-ninth part is  
 devoted to a description  
 of the various species of  
 ctenophores which are  
 found in the same region.  
 The fiftieth part is  
 devoted to a description  
 of the various species of  
 tunicates which are found  
 in the same region.

Handwritten text, very faint and illegible. Appears to be a list or a series of notes.
